Art Unit: 2833

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 57 is rejected under 35 U.S.C. 103(a) as being unpatentable over Davis et al (843) in view of Demler, Jr. et al. (4,881,905).

Davis, Figs. 9 and 11 show a power receptacle having a receptacle housing 2, a conductive receptacle contact 6 with a pair of walls (not labeled), Fig. 3 shows a power plug having a plug housing (2, 7), a conductive plug 6 with a pair of spaced walls (not labeled) having beams 9, distal portions of the beams having projections forming an air gap. Davis does not show the distal portions of the beams can come in contact to each other. Demler, Jr., Fig. 11 shows a conductive plug 280 with beams 282, 282' can come in contact to each other when the plug is inserted into a receptacle contact 80. It would have been obvious to one with skill in the art to modify the connector of Davis by removing the devided portion (7,19) of the plug housing so that the distal portions of the beams can come in contact to each other, as taught by Demler, in order to allow more positive connection.

3. Applicant's arguments filed 2/5/03 have been fully considered but they are not persuasive.

In response to the applicant's remarks in page 2, applicants state that the various members

between the fingers 9 will inhibit heat flow. The examiner disagrees since the space between the fingers is clearly big enough to allow heat flowing there between.

The other remarks are considered to be fully addressed in the rejection above.
